LBL Series

The LBL series is a significant breakthrough in style and design excellence—a perfect combination of good looks and feature-rich practicality that brings new heights in elegance.

From the range of high quality plate finishes to the stylish, chamfered edges, LBL series will blend in beautifully with any décor. The high quality finish- unhindered by any visible screw caps- combines the practical, non-marking advantages of a shiny, highly polished switch plate with the fashionable, unobtrusive appearance of a traditional matt finish.

Designed in consultation with practicing electricians and endorsed by leading architects, the LBL Series is a uniquely elegant addition to today's décor and design.
